

## What is Moissanite ?

There is a lot of moissanite info available on the Internet. Just simply scanning this moissanite info will show that moissanite is one of the most precious jewels on the planet. Moissanite contains many properties that other jewels do not possess. And this is one of the reasons why it took 104 years to learn how to reproduce this jewel in a laboratory. Moissanite info as described is easily available and all this info will show that moissanite is superior to many jewels in many different ways. Not only is moissanite more beautiful than diamonds but it is also known as being a superior diamond simulant. But it is a minor simulant because of the high cost and also the fact that there is a limited production of moissanite.

As production of moissanite picks up you can be sure that this will become a major diamond simulant. However most moissanite info will just tell you how limited moissanite is and also there will be a lot of comparisons to diamonds. Tests have been done on moissanite to see if this jewel is better than diamonds. The tests show that moissanite is superior than diamonds but people will always come to their own conclusions. If they want moissanite jewellery then they will buy that rather than diamonds. But diamonds are more well-known and therefore this will still be the best seller out of the two for many more years.

Many people including jewellers can mistake moissanite for diamonds it is only jewellers with a lot of knowledge of moissanite that will be able to tell the difference between moissanite and diamonds. They have gained a lot of valuable moissanite info and they know what the difference is between the two but it is not easy to tell the difference.

Nearly all moissanite info will contain the well-known facts that moissanite takes 104 years to reproduce in a laboratory. Also the fact that moissanite actually originated from a meteoroid crater in Arizona. Simple moissanite info is easy to find and if you look around you will find info on how to tell the difference between moissanite and diamonds. This could prove to be very helpful because some jewellers that cannot tell the difference will put moissanite on sale for the price of diamonds and this can equal a big saving for you.

Moissanite is going to be around for a long time and so it might be helpful for you to get some information on the jewel that could very well take the world by storm.
