

How To Choose A Bow That Can Land You A Prize Buck

The ability to shoot well is acquired through strict self-discipline and compliance with approved shooting methods. The material in this article is intended to guide the beginner in acquiring the right archery equipment which will help that person become a skilled marksman.

Whenever archers get together there are always those who would have us believe that since our ancestors shot a bows five fifty thousand years ago that we moderns can shoot a bow instinctively. Others think that all we have to do to hit a mark or bag our buck is to take a deep breath, look at the target, draw the arrow back to the ear, and let fly. However, it takes much more practice to hone the skills need to land that prize buck.

The bow has developed greatly over the past few years. Now there are more varieties available than ever before. Because of the variety of materials used to construct bows and all the varieties of arrows to choose from, picking a bow that's right for you can be a hard task. Here you will find the basics that every novice needs to know before he or she goes shopping for the perfect bow to land a big buck.

If you do not number any archers among your acquaintances, an inquiry addressed to your State Game Agency should bring you the name and address of your state archery organization and they in turn could advise you of clubs having range facilities for target or field shooting in your vicinity, or the name of an archer who will be glad to help you get your feet set firmly on the shooting line.

Remember, most target bows for men who are experienced archers do not exceed 45 pounds in drawing weight. Ladies rarely draw a bow weighing more than 30 pounds. A beginner is advised not to attempt to use these drawing weights in learning to shoot a bow. A rough guide for determining a bow of suitable weight to use on your first attempt at archery is: Youngsters up to 10 years old, not to exceed 15 pounds; 10 to 16 years of age, 20 to 25 pounds; over 16 years of age, 25 to 30 pounds. Once you have selected your bow, the chart below will help you choose the correct arrows to match with it.

A basic rule which the beginner should keep before him at all times, is that archery is not a test of strength, but a game of skill, and to enjoy shooting a bow, skill must be acquired. As with any other sport, good form is gained through practicing the correct procedure at all times. Scores will not improve just by shooting. Technique is most important, and it is gained through observing the performance of skilled archers on the shooting line, seeking personal advice and instruction. Now that you know how to choose a bow and proper arrows to fit it, all you need is a little practice and you will be bringing home a prize buck to mount on your wall.
