

The Wonderful Animated World of Disney Movies

Even though Disney has produced myriad movies, it is more popular for its animated ones. After starting the animated journey with Snow White and the Seven Dwarfs in the winter of 1937, Disney movies have not looked back. One can obtain a list of more than 150 animated Disney movies that have been produced and distributed to add to the joy of children across the world.

After a certain age, kids grow out of Sesame Street, Tellytubbies and BooBaahs. At this time the next level of entertainment that attracts them generally are the Disney movies that appeal to a slightly older age group. The great thing about these movies, which has probably led to the huge popularity of the Disney movies, is the fact that they appeal to adults and children alike. A mother does not mind sitting through a Disney movie with her child but an episode of Tellytubbies can be wearisome.

To the uninitiated, it may be a surprise that each Disney movie comes accompanied with a Disney movie book. These books are published under the Mouse Works banner and contain a simple version of the story. This can help in encouraging children to not only see the Disney movies but also to read books, which hopefully will extend to other forms of reading at some time.

Though the company is proud of all its Disney movie productions, some of them have attained the stature of classics based on their popularity. Abound with simple, yet meaningful songs these Disney movies can expose the child to emotions, morals and ways of the world while telling a story. Toddlers seem to enjoy the light evilness of some of the characters like the witch in Snow White and Cruella De Vil in the 101 Dalmations. Alternately, some of the most endearing characters that Disney movies have created are Tramp in The Lady and the Tramp and the Beast in Beauty and the Beast. But most of the leading characters in Disney movies inspire awe and amazement aided by the color, grandeur and dazzle.

Some of the Disney movies that have become all time favorites of most kids are The Lion King, Toy Story, Aladdin, Beauty and the Beast, The Jungle Book, The little Mermaid, Sleeping Beauty, Lady and the Tramp, Cinderella and of course Snow White and the Seven Dwarfs. Some of the less known but equally enticing Disney movies are the sequels to the Lion King, Dumbo, Lilo and Stitch, Pooh and Kim Possible series.

In spite of the high levels of endearment that the Disney movies enjoy among most people, there are rumors galore about how there are countless hidden references to perverted things in the animated movies. The most known references are made to the tower on the cover of The Little Mermaid that resembles the male genitalia, the apparent erection of the priest in the wedding scene of the same movie and the dust taking the form of the word 'sex' in The Lion King. Hearsay has it that Donald Duck has used vulgar words umpteen times during angry outbreaks.

Some opine that these subtle references have become a tradition at the Disney studios. This tradition started due to the fact that Walt Disney did not assign relevant credits to the creative animators. These animators, then, took to including hidden codes in the animation scenes to get back. One such example is that of the shorts that Goofy wears. If you look close enough, you will probably see names of artists written on these shorts. Though the given instance seems possible, the inclusion of debauchery in the animated Disney movies is debatable and it remains a question as to whether it is a fact or the Rorschach effect.
