

## The Benefits of a Powered Air Mattress

A powered air mattress is a great addition to any family. Being able to quickly and efficiently blow up a mattress makes it a terrific investment for when family or friends visit or you take a trip or vacation.

Campers love these mattresses when they are going to a camp ground that offers a power source. It is quick to inflate and is much more comfortable than trying to sleep on the ground.

Families that have overnight guests can use a powered air mattress to make an instant guest bedroom for expected and unexpected overnight visitors. Rather than spending an hour trying to blow up a mattress with a hand pump, foot pump, or your own breath, you can use a powered air mattress.

A good night's sleep cannot be overstated and that is why people use air mattresses rather than sleeping on hard floors, the outdoors, or even a lumpy or overly cramped couch. They come in sizes ranging from twin size to king size which makes them perfect for just about anyone.

The difference between a powered air mattress and a standard air mattress is in ease of use. Being able to blow up the air mattress by pressing a button is much easier and more efficient than the time and energy it takes to blow up an air mattress with a standard foot pump or hand pump and most mattresses are simply too big to try to blow up from your own breath!

When you buy a powered air mattress you want to make sure that you test it before you need it in order to ensure there are no leaks. Many air mattresses come with patch kits in case it does get a leak. In recent years the quality of air mattresses has improved dramatically resulting in more durable and more comfortable air mattresses than ever before.

As you research powered air mattresses online you will find a number of different options and stated purposes. Choose the air mattress that will fit your needs and provide you or your guests many nights of a comfortable sleep. They are easier to store and transport than ever before and since they come with their own powered-pump that can be set up in a matter of minutes virtually anywhere you have the empty space!

Turn any room into a guest room with a great powered air mattress.
