In other words, the words may be harsh, fashion jewelries are fake jewelries.

When you say fake, that means the materials by which every fashion jewelry is made up is fake or is not really expensive. ### The advantage of wearing fashion jewelry

The first and primary advantage of wearing fashion jewelry is its relative low cost. Yes, because fashion jewelries are fake jewelries, it is expected and logical that the tag prices are not as significant and as expensive as the premium and genuine expensive jewelries. For example a gold fashion jewelry would naturally cost significantly cheaper than the actual market cost for real gold jewelry.

However, despite the big difference in pricing, it would be amazing that fashion jewelries are still looking as elegant, as gorgeous and as breath-taking as any other expensive jewelries in the market today. The dangling appeal and the fancy reception of bystanders and admirers to fashion jewelry is at the same magnitude as the adoration provided and paid to real and genuine expensive jewelries.

Another advantage of wearing fashion jewelry is that you would have a sense of safety and security. If ever you would be robbed while wearing the jewelry, you could be sure that you are not standing to lose a significant amount of money or asset. Fashion jewelries are cheap so you could easily buy hundreds of them anytime you desire. And you could easily dispose them if they already not usable.

Burglars and thieves certainly would not like it if people would heavily patronize fashion jewelry. That means that the robbers' efforts to steal and forcefully take a precious jewelry would be futile if they would be robbing fashion jewelry.
