

Divorce Mediation A Relatively Speedy and Low Cost Alternative

Is it possible to have an easy divorce? A low cost divorce? Or do all divorce settlements necessarily end in hard feelings and financial ruin? The truth is that divorce can be low-cost and easy... or it can be a long ordeal that can drag on for months. No matter how emotional things get, just remember that you always have a choice and that your willingness to negotiate through mediation can help speed up the whole process, thereby minimizing the pain inflicted on your family.

Mediation is a legal process in which a trained, impartial third-party will offer divorce help and support by assisting both parties to reach an agreement. A couple preparing to divorce should not rely solely on a mediator. Rather, the husband and wife should consult their respective attorneys about their specific procedures and legal consequences of the mediation process.

If mediation is not successful, then the case must go to trial. In most cases, it is best to avoid a trial as attorney's fees, alone, can pile up if delaying tactics are used. Furthermore, studies show that people feel more satisfied with mediated Separation Agreements than with those that are ordered by the court. Finally, since the process is more civil and less emotionally grueling, mediation minimizes any trauma to the children.

Life after divorce can be a fresh new start. Mediation can not only save time and money, but can also reduce emotional and psychological baggage for everyone.
