

## Here Is The Secret Of My Success

Your subconscious mind is always saying "yes!"

This "yes" is a very powerful thing. While your conscious mind can only process about 7 bits of information per second, your subconscious mind can process 7 billion bits of information per second. While your conscious mind can barely remember what happened an hour ago, your subconscious mind can remember everything with total recall.

What is your subconscious mind saying "yes" to?

Do you say things like this to yourself: "I don't earn enough. I can't afford it. Why do they charge so much? I'd really like to get it but I can't afford it right now. That's all the company pays." If you're thinking these thoughts, your subconscious mind is saying "yes" to it and you're getting more of what you don't want.

Do you say things like this to yourself: "I feel really tired right now. My back and shoulders are killing me. What wouldn't I do for just a little more energy. I could accomplish so much more if I didn't feel this bad all the time." Again, your subconscious mind is saying "yes" to it.

Do you say things like this to yourself: "I feel so lonely. Nobody really loves me. They're all just pretending to be my friends because they want something from me.

He/she just doesn't love me the way they used to. People are really mean to me. It always amazes me how rude/crude/ungrateful/selfish/stupid other people can be. I could accomplish so much more if they just gave me a chance." Again, your subconscious mind is saying "yes" to it.

You can turn this around by thinking completely different thoughts. "I can afford this right now because what I will learn from it will bring my money back quickly. I am really at the right place here to earn more. I'm going to make this investment right now."

Similarly, you can be thinking, "The more I exercise and eat right the better I feel. When I feel tired, it's fine for me to rest and get my energy back."

And you can be thinking, "It's great to be me. It's funny how people go out of their way to make me happy."

Since your subconscious mind is saying "yes" to these things, too, you will soon find yourself attracting more money, more health, and more positive relationships.

Your subconscious mind is a vast reservoir of pure intelligence. It powerfully supports you in whatever you think or dream.

Your subconscious mind hooks up to the super-conscious mind to bring you serendipity and synchronicity. You start getting into the right moods, start working more productively, start sharing more of yourself with others. You start feeling better and acting more intelligently. You start to get intuitions and wonderful coincidences fall into your lap.

I'd like to give you an example of how amazing all this stuff is from my own experience. The other day I came across a website where I wanted to get the product. I thought, "I'd like to get this." It was an expensive product but I was fine with it because I knew I could afford it. Then I got a telephone call and got busy and actually forgot about this website.

However, my subconscious mind had said "yes" to it.

Then yesterday I got an email from someone I did not know. They said that they had been to my website and really liked my products and what I was doing online. They sent me a link to their product, asking me what I thought about it. Imagine my surprise when I downloaded the product to find that it was the exact product I was intending to buy the other day!

Stuff like this happens to me all the time. Why? It's because I know that my subconscious mind is saying "yes" to whatever I ask and I have trained myself to ask for what I want and to completely ignore what I don't want. I could tell you many other stories where things just show up for me with no effort on my part, but I think you get the point.

That's my secret, and now you know it too and can apply it.
