

## Car Rental Services Add Convenience To Your Travels

While on vacation, you and your family are eager to explore and to get to know the people and the culture at your own pace and leisure, but you may find the organized tours too boring and hectic, and the public transport system too confusing and challenging. To get the most out of your vacation the best solution for you may be to rent a car.

The quickest way for you to find a car rental service is to search on the internet or just to leaf through the yellow pages of your local directory or to look at the classified pages of the local newspapers. You should easily be able to find plenty of advertisements for the local rent-a-cars.

If you are unfamiliar with what car rental services are, they are services that engage in the business of renting out cars for short periods of time, most often to visitors or travelers. And the length of this rental period may vary from just a few hours to even a few weeks. Obviously this kind of car rental service does require a fee, but the rental car rates are usually quite reasonable depending on the type of rental car you want to drive, ranging from small compact cars to family-sized minivans or SUVs.

If you need to locate a car rental service, networks and branches of numerous rental car agencies can be found spread out across the entire country and sometimes abroad as well. These car rental agencies are generally located near airports or in central locations of cities. So even if you are unfamiliar with a new city, it is not at all hard to locate a car rental agency.

Not only do rental car services cater to travelers; they also cater to those people whose cars are temporarily out of service, damaged or destroyed, and also to those who may be waiting for an insurance renewal. Other than renting out passenger cars, car rental agencies also rent out heavy duty vehicles such as vans or trucks for industrial transportation purposes.

If you decide to use a car rental service you have to keep the following points in mind:

- \* You have to return the car exactly in the same condition as it was at the time of renting.
- \* You have to pay extra charges if you exceed the distance that was stipulated in the contract.
- \* You must be over a specific age in order to be able to rent a car. In some state this age can be as high as 25.
- \* Many of the agencies take advantage of GPS technology to ensure that the car is not driven above a certain speed limit or does not go beyond a specified territorial limit.
