

Cathay CCIE R&S Boot Camp Training

The CCIE R&S (LAB) Boot Camp location can be sit at Guangzhou or Dalian, China.

1. CCIE (LAB) Bootcamp

There are two tracks for R&S (LAB) Boot camp, one is called Intensive Track (CRSLT-I), which takes 14 days to have it done, the other is called Fast Track (CRSLT-F) which probably takes 18 days. www.cathayschool.com

The premise for taking CCIE R&S lab Boot Camp is that:

You are Current holder of CCNP Certification or you have passed CCIE® written exam or that you have 2 years experience with Cisco® equipment

(1) Intensive Track (CRSLT-I) 14 days (112+ hours)

The intensive track lasts 14days and the price for it is US\$18, which including fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

General study arrangement: In this track, you will receive six and half hours on learning technology, then five and half hours on applying technology each day.

The Intensive Track is designed for the students who have limited time and are almost ready for the final exam. During the first week, your instructor will help to strengthen the specific weaknesses of your knowledge and review the most important parts of the exam topics with you. During the second week, you will be given access to a minimum of four most up-to-date mock labs. This special process will adequately and competently prepare you for the final with the aid of step-by-step instruction by your instructor

CCIE Routing&Switching LAB Table of Content:

Catalyst 3550, Frame-Relay, HDLC/PPP, Interior Gateway Routing, Exterior Gateway Routing, IP Multicast, Quality of Service (QoS)IPv6, Security, System Management, IP Services, Miscellaneous.

(2) Fast Track (CRSLT-F) 18 days (148+ hours)

The fast track lasts 18days and the price for it is US\$ 7330 which including fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

General study arrangement: In this training track, you will gain six and half hours' training on learning technologies, then five and half hours on applying technologies each day during the first week. And in the second week, you will receive five and half hours' training on learning technologies, then six and five hours' on applying technologies each day.

The fast track is designed for the students who would like to obtain technical and to be well-prepared for the actual exam. Each student will receive a full customized study plan based on his specific weakness after being given a simulating test by his/her instructor. Besides, we provide more numbers of challenging and up-to-date mock labs than any competitor which will definitely become the key weapon for you to success.

CCIE Routing&Switching LAB Table of Content:

Catalyst 3550, Frame-Relay, HDLC/PPP, Interior Gateway Routing, Exterior Gateway Routing, IP Multicast, Quality of Service (QoS)IPv6, Security, System Management, IP Services, Miscellaneous.

2. Cathay's CCIE RS Written Exam Training (CRSWET) 5 days (45+ hours)

The CCIE R&S Written exam training lasts 5 days and the price for it is US\$ 3175, which including fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

3. 1-Stop Training - Fast Track (CRSAT-F); Fast Track (CRSAT-F) 21 days (168+ hours)

The CCIE R&S training fast track lasts 21days and the price for it is US35, which including Fee for one-on-one instruction, course material, accommodation, meals, and other relevant transportation fee etc.

The 1-stop CCIE® training includes technologies of both written exam and lab exam. During your stay in Cathay School, a CCIE instructor will work with you to ensure that you will pass the written and lab exam in one go. If you are looking for the class which will actually bring you both technologies and certificate, don't hesitate to choose us. Each student will receive a full customized study plan based on his specific weakness after being given a simulating test by his/her instructor. Besides, we provide more numbers of challenging and up-to-date mock labs than any competitor which will definitely become the key weapon for you to success.

Pre-class requirements: Current CCNP Certification or 2 years experience with Cisco® equipment

General Study Arrangement: In the duration that you are studying our courses, you will receive seven hours' training on learning technologies and three hours' on applying technologies each day during the first period of study. When it comes to the second period, you will gain five and half hours on learning technologies, then six and half hours on applying technologies each day.

P.S.

How to save big money while obtaining knowledge?

You can save 10% if you fund your study 30 days ahead, 5% for two participants together and 10% for 3. While in group training, if your company would like to send four or more participants to our boot camps, please contact us for a substantial discount.

Our promise: We guarantee that if you failed to pass the relevant exam and get the certification after taking your boot camp, you can return to ours and retake the boot camp free of charge but pay the hotel's, meals and test voucher only. Furthermore, we believe this course offers the best possible training in this field. You can advice the instructor to withdraw from our courses and handle the relevant materials if you are not satisfied during the first 2 days of your study.
