

## What Is A Money Merge Account?

Lately there has been a lot of talk about setting up a "money merge account" What exactly is a money merge account? Well simply put, it's a way of managing your money to help you quickly eliminate your mortgage. It is truly a revolutionary way to use the money that you already have to pay-down a mortgage very quickly. You will find that several mortgage lenders are learning about this concept and offering you their own version of this type of account. There are two issues with going through a lender or other company offering this:

1. They are going to charge you a hefty fee for you to set-up this account with them and teach you how to use it.
2. It's limited to just homeowners when a large part of the population has debt and should be able to take advantage of this type of account and information.

In conclusion, a money merge account is like any other great idea whose time has come, but why pay such a high price to take advantage of this information when you can very easily set this up yourself with just a little bit of knowledge.
