

The Reasons for Choosing a Linux Hosting Plan

When you have your own website, you may get confused whether you want to avail of a shared host plan or not. Deciding over this is something which you think over carefully. There are some web hosting services which are offered at expensive costs, while there are some services which are provided for a low price. When you choose a cheap host plan over a plan which requires a lot of budget, you will be able to get various benefits.

Opt for the Affordable Web Hosting Services of The Magic Host

Choosing web host services is a decision which you have to consider, especially when you already have a website. If you have more than one site, a shared hosting plan can be of great importance. With the low-cost charges of shared hosting, you will be able to transfer or restore your sites without preparing a huge budget. When you want to make an investment out of your websites, you should make sure that your money does not go to waste. Being definite with your plans entail you to make a wise decision regarding the most suitable type of hosting plan. In order for you to get the most affordable web hosting services, go for The Magic Host.

The Hosting Plans of The Magic Host

When you go for the web hosting services of The Magic Host, you will be provided with several choices of operating systems such as:

- Windows
- Oracle
- Solaris
- Linux
- FreeBSD

Why Linux is Cheaper and More Reliable

One of the well-known types of hosting plans at The Magic Host is Linux. Compared with other plans, Linux is relatively cheaper due to various reasons.

- While there are monthly fees, you are not required to settle setup fees. This means that you are not obligated to pay for the start-up services.
- If ever you have begun to pay for the services that you have availed of and you are not satisfied with what you are getting, you are entitled to get your money back. However, this guarantee lasts only for thirty days after you have availed of the plan.
- You are offered with great reseller privileges, which you can avail of at a low cost.
- There are several Linux hosting plans to choose from, all of which you can upgrade to a wider bandwidth and disk space. Aside from free setup, the domain name is also offered for free.

The Advantages That You Get from The Magic Host

When you are tied up to the permanent virtual host plan of a company, there is a way out for you. The Magic Host has affordable terms which you can buy out. Even if this company is already your web hosting provider, you can still buy out terms from other companies. When you go for the shared hosting services of The Magic Host, you will benefit from its low prices. For as low as \$4.50; you will be able to develop a website for your business. With the reseller privileges that the company provides to its clients, you will be able to manage your website fully. Some of these reseller privileges are triple backup, WHM access, WHMCS support and billing system, private name server, and other terms. It is up to which term you want to purchase.
